

**MRD** LONDON

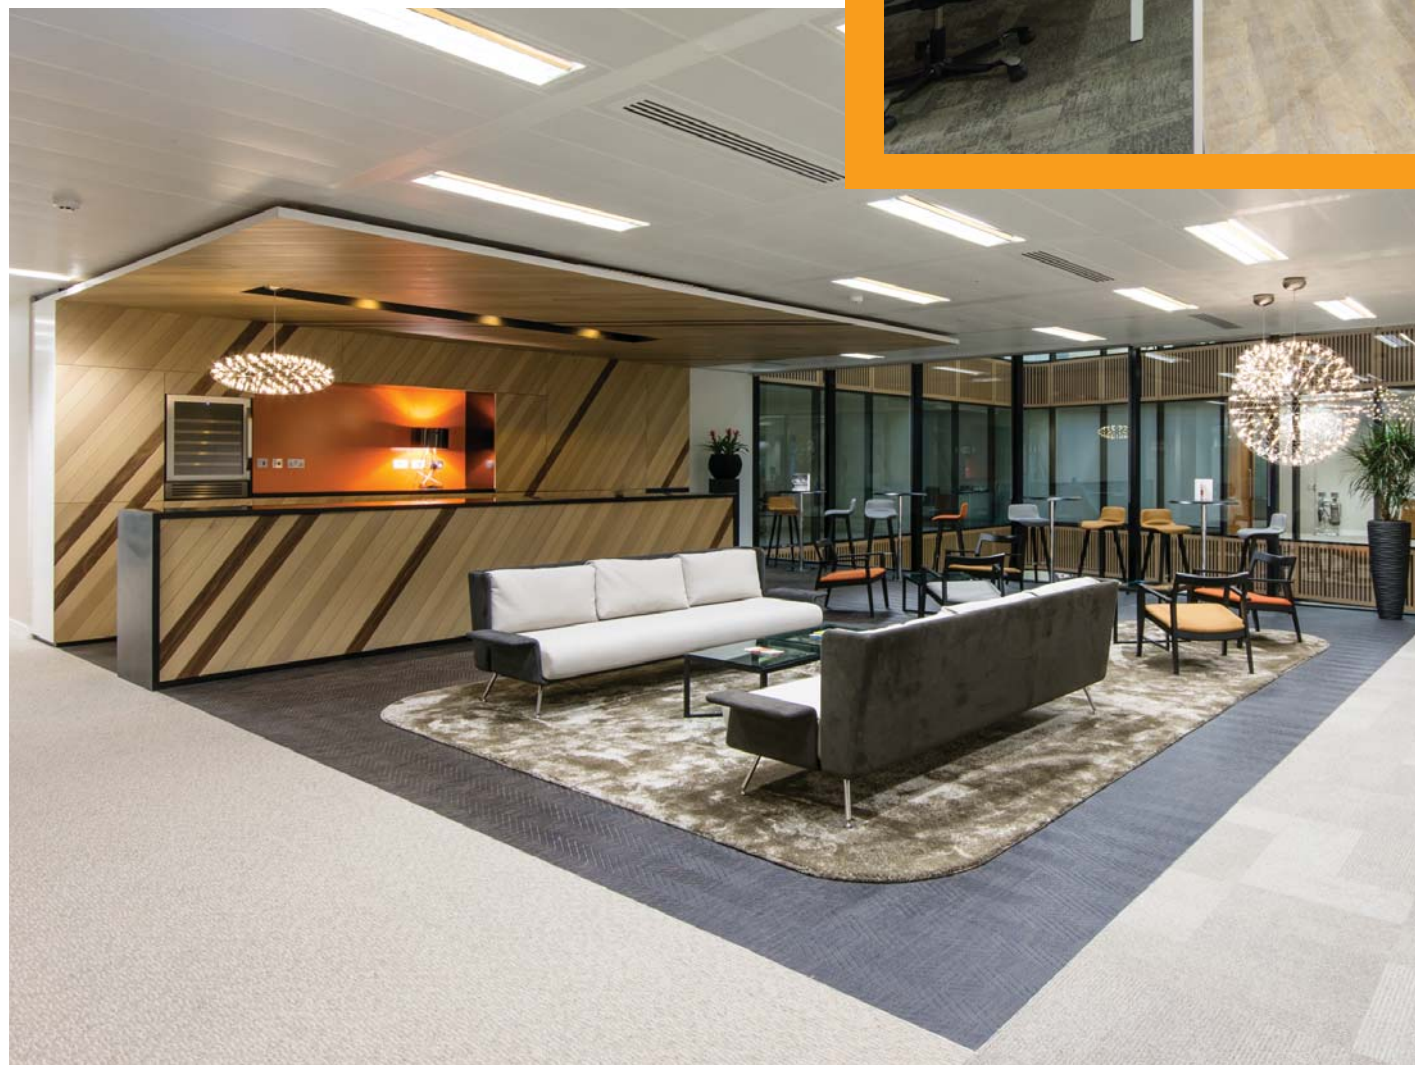

# STUDIO

We are a bespoke studio offering clients a personal and practical design service. Founded by Charlotte Moorley and Scott Richardson in 2008 we now have an established reputation for creative and functional interiors. We love what we do and this is reflected in our commitment to our work and our clients, many of whom we have worked with on repeat projects demonstrating our success.

'I cannot fault the MRD team; at all levels they're friendly, approachable and extremely professional.'

End user client

# DESIGN

We concentrate on creating unique, tailor-made commercial interiors. Our team has extensive professional experience and works efficiently within specific budgets and time frames. We always ensure that all possible costs and obstacles are identified and discussed before work commences on a project. Presentations are created using a combination of 3D visuals, AutoCAD drawings and design boards generated from our extensive in-studio reference and sample libraries.

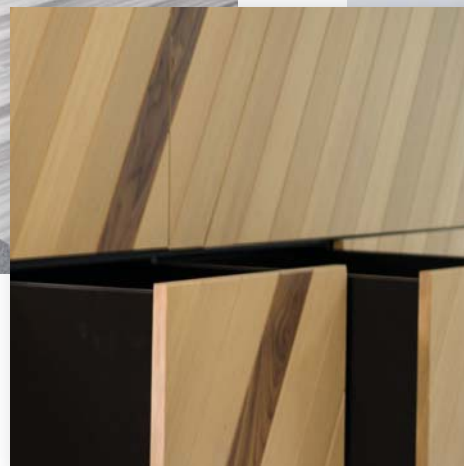

# CLIENT

Each of our clients and the spaces we design are unique, ranging from small start-ups to FTSE100 businesses. Through close consultation our work seeks to reflect this individuality, to meet our clients aspirations. Life is too short to spend your time in dull or inefficient spaces, a creative work environment leads to engaged and enthusiastic people.

'We have found them to be highly professional, enthusiastic and totally dedicated in providing both interior design and space planning services for sometimes very demanding clients.'

Project manager

# REALISATION

Our aim is to elevate your business through the power of fantastic design. Effective design doesn't just look good it can also increase productivity, attract and motivate staff, reinforce your brand, reduce costs, improve green credentials and release equity. Whilst maintaining the fundamentals of creativity, technical expertise, sound knowledge and a proven track record we also apply leadership skills and teamwork to each project to enable the best possible outcome.

## FURNISHINGS

We keep up to date with the latest products by continually reviewing and visiting showrooms and exhibitions throughout the UK and Europe and have an extensive in-house library of manufacturers and suppliers. Should we not be able to source something suitable we can design a bespoke solution that can be built by one of our recognised talented craftsmen to give you a unique product.

'Her [Charlotte's] understanding of the client requirements (including wrestling with the inevitable politics involved), experience and enthusiasm for delivering design excellence within a tough controlled budget were outstanding.'

End user client

## ENVIRONMENTAL

The environment is a key factor in any design and is always considered by us with any project. We ensure that all timbers used are FCS or PEFC accredited and any materials specified have as neutral impact as possible. We have completed many projects that are SKA or BREEAM assessed and are well versed in working to these parameters.

'Their laid back and non precious design approach coupled with their quick grasp of determining clients' requirements makes them very user friendly.'
